

How to Use Micro-Pak Container Desiccants

Recommended Dosage of Micro-Pak Container Desiccants:

Container Size	Dosage of Micro-Pak Container Desiccants (strips)
20'	4
40'	6
40' HQ	7
45'	8

Procedure to install and store Micro-Pak Container Desiccants:

1

Open the carton and remove strips from the polybag. Do this immediately before cargo loading.

2

Seal all container vents using 2-ply duct tape.

3

Hang strips vertically to the container lashing hooks with desiccants facing the cargo.

4

Load cargo immediately after installing desiccants. Take care not to damage the desiccant bags during loading.

5

Seal container doors.

6

Store unused strips in the original polybag and close the carton. Keep in a dry place, under normal temperatures, and out of sunlight.
